

## Appendix 9

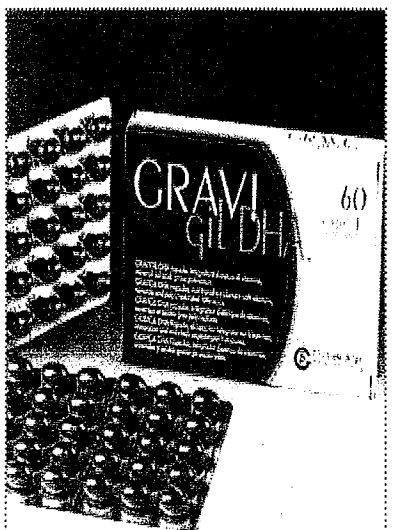

### Examples of Food Products Containing DHA-rich Algal Oil on the EU Market

## Instituto Ganassini - Gravigil DHA (Italy)

---

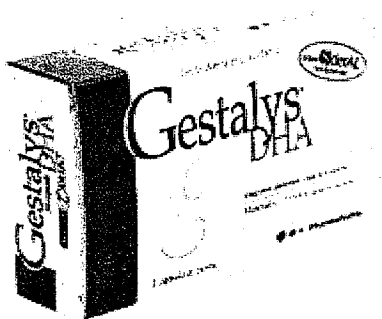

### Gravigil DHA

Very new dietary supplement of vitamins and minerals with folic acid, iron and omega-3 docosahexaenoic acid (DHA). DHA has demonstrated to be fundamental for the fetus and newborn neuro-vegetative development till the weaning and for the prevention of depressive troubles, typical of post partum, in the mother. Due to the presence of DHA, it is suggested to take the product in the last three months of pregnancy and during the suckling period is suggested. Gravigil DHA is available in packaging of 60 capsules.

## PharmaNutra – Gestalys DHA (Italy)

## Bassett's Soft & Chewy Omega-3 DHA & Vitamins A, C, D & E

- 100mg Omega-3 DHA and 100% RDA of essential vitamins A, C, D & E in a one a day pastille
- Two delicious flavours: orange and lemon and summer fruit
- Easy to take soft & chewy pastille
- Sugar free
- For children aged 3+
- Jelly Baby face on pastille

A delicious way for children to take essential Omega-3 DHA and vitamins!

Omega-3 DHA (docosahexaenoic acid) is essential for brain & eye development and may help to maintain healthy brain function, maintain levels of concentration and promote healthy brain and eye development for infants and young children. Omega 3-DHA must be obtained from the diet to maintain a healthy level in the body.

Vitamins A, C, D & E play an essential role in the healthy growth and development of the young, helping to promote healthy bones, teeth & gums, healthy eyes and skin and resistance to infection.
