July 2006

Dear Colleague

CLASSIFICATION OF SHELLFISH HARVESTING AREAS DOCUMENT 2006

The Classification of Shellfish Harvesting Areas Document 2006, is enclosed for your information. This document has been finalised following the appeals process which is now complete for the year. The document should be able to provide you with all current shellfish harvesting area details.

The classification document is divided into each Local Authority. The details of each site for each Local Authority are then stipulated, with any declassified sites are noted in a separate report. The supporting documentation will follow in due course.

Each Production Area has been provided with a Site Identification Number (SIN). It is essential that this number is used on all laboratory sample submission forms. This will assist us all in accurately managing sample results.

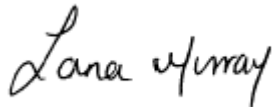

I would ask you to confirm receipt of this document by signing the enclosed receipt form and returning it to the Food Standards Agency Scotland.

For your information, here are the current contact details for FSA Scotland.

Name	Title	Telephone	Email
