** Product sold loose/product (re)packed by retailer

ND = Not detected

P = alleles are compatible with the declared variety being the predominant variety present

M = the declared variety may be present as the minor component of a mixture

Table 1. Details and results for samples collected during survey

Sample code	Brand name	Product name	Address of Man/Ret/Pack	Stated country of origin	Lot/batch code	Weight	Declared variety	Declared variety present?	Non-Basmati rice content (%)
-------------	------------	--------------	-------------------------	--------------------------	----------------	--------	------------------	---------------------------	------------------------------

<LoM = Less than limit of measurement (i.e. mean adulterant found to be <6%)

N = alleles are not compatible with the presence of the declared variety

Note that for percentage non-Basmati rice levels greater than 60% the accuracy of the assay is limited
