

Local Authority Capacity and Capability: Annex C Infographics of qualification pathways

Any irregularities relating to wages are as a result of a 'single point in time' sample of available job vacancies with wages varying by location. As such the sample may not be representative of the wages of current employees within the sector. The first infographic details the qualification route for Trading Standards and Environmental Health professionals. The following two infographics contain the Environmental Health and Trading Standards career routes respectively. The qualifications that feature in the top 2 levels of both of these infographics are examples of the typical qualification route that could be taken prior to entering the sector. Alternative routes are possible and will feature the apprenticeships and professional courses detailed on the first infographic.

Qualification Pathway to Trading Standards/ Environmental Health Career

*These courses are not specific to food and feed regulation. Trading Standards and Environmental Health professionals regulate areas such as housing, health and safety, product safety and many others. Graduates of these courses can specialise in these sectors instead of food and feed regulation if they choose to.

**Official food and feed controls

Environmental Health Job Roles – Food and Feed

<p style="text-align: center;">Level 5 Food Premises Inspection Higher Certificate</p> <p>Equivalent to a 2-year foundation degree. Requires a Higher Education Level 4 course in a related discipline. Need to be employed and supported by an LA Environmental Health department.</p>	<p style="text-align: center;">Higher Certificate in Food Control (Level 5)</p> <p>No formal qualifications, although Level 3/4 in Food Hygiene from CIEH desirable. Often pursued by LA employees or those with experience in the food industry already.</p>
<p>Degree (Apprenticeship) in Environmental Health* (Level 6)</p> <p>Requires BBC-ABC at A level or equivalent, often including a science subject. The course covers topics that would be covered by the equivalent Level 4 or 5 foundation courses.</p>	
<p>Environmental Health Officer/Practitioner/Professional (Entry Level)</p> <p>Salary range: £27,807-£43,887 (depends on location and experience). Qualifications: Environmental Health accredited by CIEH and willingness to gain professional CIEH qualification. Experience required varies from qualifications only to previous experience in food regulation.</p>	
<p>Senior Environmental Health Officer/Practitioner/Professional</p> <p>Salary range: £37,261-£49,545 (location dependent). Qualifications: Degree in Environmental Health or equivalent and professionally qualified with CIEH. Generally, 3 years minimum experience as a Practitioner, specialising in food regulation, some LA also require managerial experience.</p>	
<p>Principal Environmental Health Officer/ Environmental Health Team Manager/ Lead Practitioner /Professional</p> <p>Salary range: £37,261-£53,996 (location dependent). Qualifications: Degree in Environmental Health or equivalent and professionally qualified with CIEH. All require both experience as a Practitioner specializing in food and management experience. Expected number of years is 8-10 minimum, with 3-5 years as a Practitioner and 5 as a Senior Practitioner.</p>	

N.B. Environmental Health Officers/Practitioners also regulate sectors such as housing, environmental pollution & H&S. They may specialise in food, be a general Environmental Health Officer/Practitioner or specialise in another discipline. Delivery of food and feed official controls are only one aspect of the role.

Trading Standards / Food Standards/Feed Job Roles

<p style="text-align: center;">Level 4 Regulatory Compliance Officer Apprenticeship*</p> <p>Equivalent to a 1-year foundation degree. Requires GCSEs (Level 2) in Maths and English and any additional employer requirements. Graduates also only need to complete the two- hour exam to gain CTSI Trading Standards Practitioner Certificate (TSPC).</p>	<p style="text-align: center;">Trading Standards Practitioner Certificate (TSPC – Level 4)*</p> <p>Available to students who have successfully completed the required elements or transitioned into the CQF at this level.</p>
<p style="text-align: center;">Trading Standards Professional Apprenticeship* (Level 6)</p> <p>Requires Level 2 Maths and English. Graduates eligible for the Chartered Trading Standards Practitioner status. Graduates of RCO Level 4 apprenticeship only need to do the second 2 years of the course. Apprentices completing food and feed modules to submit themselves to CTSI's Qualification Framework assessments.</p>	<p style="text-align: center;">Trading Standards Practitioner Diploma (TSPD – Level 5)*</p> <p>Available to students who have acquired TSPC or successfully completed the required elements or transitioned into the CQF at this level.</p>
