Statws y prosiect: Wedi'i gwblhau

Cod prosiect: RP1528

Cynhaliwyd gan: Regulated Products Risk Assessment Unit FSA and Risk Assessment Team FSS

Dyddiad cyhoeddi: 28 Mawrth 2024

Summary

The FSA/FSS Food Standards Agency and Food Standards Scotland (FSA/FSS) have reviewed an assessment of application RP1528 for the renewal of authorisation of Lactiplantibacillus plantarum (previously lactobacillus) NCIMB 30084 for its use as a technological additive, functional group of silage additive, in all animal species.

This feed additive application has been made to renew the authorisation in Great Britain (GB) as it is 10 years since the product was authorised and placed on the market in the EU. The same product and uses have been authorised in multiple other countries as the information and data demonstrate the regulatory criteria are met. This feed additive had its application for renewal of authorisation assessed by the European Food Safety Authority (EFSA), which was published in 2023. FSA/FSS have reviewed the information available, including the EFSA renewal opinion¹ and confirmed that Lactiplantibacillus plantarum NCIMB 30084, as described in this application, is unlikely to have any adverse effects on human or animal health or the environment in the context of its intended uses in GB.
