Risk statement

The potential presence of Cronobacter sakazakii in the products listed above.

Symptoms caused by Cronobacter sakazakii usually include fever and diarrhoea, and in severe cases may lead to sepsis or meningitis which include symptoms in infants including poor feeding, irritability, temperature changes, jaundice (yellow skin and whites of the eyes) and abnormal breaths and movements.

Action taken by the company

Reckitt is recalling the above products and have contacted all stores and pharmacies that are supplying these products. The company has also issued a recall notice to its customers. These

notices explain to customers why the products are being recalled and tells them what to do if they have bought the products. Please see the attached notice.

Our advice to consumers

If you have purchased or been prescribed any of the above product batches, do not feed it to your baby and return to the place of purchase. If you have additional questions, please contact Reckitt on 01895 230575. If you have any concerns about the health of your baby, please seek medical advice.

About product recalls and withdrawals

If there is a problem with a food product that means it should not be sold, then it might be 'withdrawn' (taken off the shelves) or 'recalled' (when customers are asked to return the product). The FSA issues Product Recall Information Notices to let consumers and local authorities know about problems associated with food. In some cases, a 'Food Alert for Action' is issued. This provides local authorities with details of specific action to be taken on behalf of consumers.
