

Imports Intelligence Hub

The Imports Intelligence Hub (IIH) provides information on a range of border data and intelligence connected with the import of high-risk food and feed of non-animal origin (HRFNAO) and products of animal origin (POAO).

National Monitoring Plan - Data Analysis Report

This is a summary of the sampling results of imported products of animal origin (POAO) undertaken at UK Border Inspection Posts (BCPs), under the UK's National Monitoring Plan (NMP). NMP data for POAO have been sourced from the [Import of Products, Animals, Food and Feed System](#) (IPAFFS) where the 'random' button has been selected on the 'checks' tab. IPAFFS is GB's replacement for the EU's TRACES system.

[National Monitoring Plan for POAO: Data Analysis Report 2022-23](#)

Early Warning System (EWS)

The imports Early Warning System (EWS) notification is usually published at the end of each month listing specific commodity/country/hazard combinations that have been identified during the previous month as "emerging" risks. This is through a process that involves the gathering and analysis of alerts from various intelligence sources from the UK, the EU and beyond.

The imports EWS objective is primarily to alert UK enforcement officers and others about these emerging risks, but also to gather further evidence and help with imported food legislation reviews.

The [EWS notifications are available on the Smarter Communications platform](#). You must sign-up and log-in on the platform to access.

Trade Control – HRFNAO

The [Trade Control & Expert System – Food of Non-Animal Origin dataset](#) contains surveillance monitoring of imported food and feed of non-animal origin undertaken by our Port Health Authorities (PHAs) and recorded on IPAFFS. We use this information to evaluate imported food risks to public health.

This is GB data from Import of Products, Animals, Food and Feed System (IPAFFS) post EU exit.

Trade Control – POAO

The [Trade Control & Expert System – Products of Animal Origin dataset](#) records the controls applied to products of animal origin imported into the United Kingdom via approved designated ports (BCPs). We use this information to evaluate imported food risks to public health.

This is GB data from Import of Products, Animals, Food and Feed System (IPAFFS) post EU exit.
