## Risk statement

The possible presence of *Listeria monocytogenes* in the products listed above.

Symptoms caused by this organism can be similar to flu and include high temperature, muscle ache or pain, chills, feeling or being sick and diarrhoea. However, in rare cases, the infection can be more severe, causing serious complications, such as meningitis.

Some people are more vulnerable to listeria infections, including those over 65 years of age, pregnant women and their unborn babies, babies less than one month old and people with weakened immune systems.

## Action taken by the company

Dunnes Stores is recalling the above products. Point of sale notices will be displayed in all retail stores in Northern Ireland that are selling the products. These notices explain to customers why the products are being recalled and tell them what to do if they have bought the products. Please see the attached notices.

## Our advice to consumers

If you have bought the above products do not eat them. Instead, return them to the store from where they were bought for a full refund.

## About product recalls and withdrawals

If there is a problem with a food product that means it should not be sold, then it might be 'withdrawn' (taken off the shelves) or 'recalled' (when customers are asked to return the product). The FSA issues Product Recall Information Notices to let consumers and local authorities know about problems associated with food. In some cases, a 'Food Alert for Action' is issued. This provides local authorities with details of specific action to be taken on behalf of consumers.
