

Feed and food official laboratories

Details of feed and food official laboratories (OLs) in Great Britain (GB) and Northern Ireland (NI) that are designated to undertake sample analysis work.

In the UK, official feed and food laboratories are Public and Agricultural Analysts and Food Examiners (microbiology laboratories) that undertake work for local authorities for enforcement purposes. Other designated laboratories undertake official controls in specified areas for monitoring purposes.

All official laboratories must employ suitably qualified staff. Laboratories undertaking enforcement work for local authorities must have a Public or Agricultural Analyst (formally appointed by a local authority) or a qualified Food Examiner.

We are responsible for designating the majority of official laboratories in the UK according to the National Control Plan, as required by Official Feed and Food Control Regulations 2017/625. We do not own or operate any of these laboratories.

Northern Ireland

In Northern Ireland, EU law continues to apply post-EU exit in respect of the majority of food and feed hygiene law, as listed in the Northern Ireland Protocol. This includes Regulation 2017/625 for Official Feed and Food Controls which specifies the requirements for the designation of EU Food and Feed Official Laboratories (OLs).

OLs which NI Competent Authorities use for the analysis of official control food and feed samples must be located in NI or within an EU Member State (MS) or third country that is a Contracting Party to the Agreement on the European Economic Area (EEA).

The Public Analysts and Food Examiners designated for NI are appointed under national law, [The Food Safety \(Northern Ireland\) Order 1991](#), therefore there is no change required regarding these designations.

England, Northern Ireland and Wales

PDF

[View Multi-Annual National Control Plan for the United Kingdom April 2019 to March 2023 \(updated December 2019\) as PDF \(Open in a new window\)](#) (1.65 MB)

Any questions should be directed to the laboratory itself.

Other specified laboratories testing Trichinella parasites

Trichinella official laboratories are designated by FSA and operate for the sole purpose of trichinella testing in meat using permitted official testing methods, under a derogation from mandatory accreditation requirements in [Retained Official Control Regulations \(OCR\) 2017/625](#) (Article 40).

These laboratories are under the supervision of the UK National Reference Laboratory for Parasites (Trichinella and Echinococcus), designated by the FSA and Food Standards Scotland (FSS).

Trichinella official laboratories in Northern Ireland will also be under the supervision of the NI National Reference Laboratory for Parasites (Trichinella, Echinococcus and Anisakis), when designated by the FSA, to cover NI interests (under requirements in the [Northern Ireland Protocol](#)).
