

# Update 3: Ferrero recalls in the UK products intended for European market

Ferrero is extending its precautionary recall of a selection of European labelled Kinder products manufactured at the Arlon factory in Belgium, which might be contaminated with Salmonella. Investigations have found that some products, intended for the European market only and which have already been recalled by Ferrero in Europe, have been imported into the UK by UK importers not linked to Ferrero. This update does not replace earlier update 2. Both updates are valid.

## **Risk statement**

The possible presence of Salmonella in the products listed above.

Symptoms caused by Salmonella usually include fever, diarrhoea and abdominal cramps.

## **Action taken by the company**

Ferrero is recalling the above products. Point of sale notices will be displayed in retail stores that are selling these products. These notices explain to customers why the products are being recalled and tell them what to do if they have bought the products.

## **Our advice to consumers**

If you have bought the above products do not eat them. Instead, please take them back to the store where you purchased the products and request a refund.

## **About product recalls and withdrawals**

If there is a problem with a food product that means it should not be sold, then it might be 'withdrawn' (taken off the shelves) or 'recalled' (when customers are asked to return the product). The FSA issues Product Withdrawal Information Notices and Product Recall Information Notices to let consumers and local authorities know about problems associated with food. In some cases, a 'Food Alert for Action' is issued. This provides local authorities with details of specific action to be taken on behalf of consumers.
