Disruptions – are achieved when we have had a direct impact on food crime. We register these with the National Crime Agency and they need to meet a certain level of impact. An example of a disruption would be the execution of a search warrant.

Outcomes - are recorded when there is an indirect impact on food crime. For example, when we issue strategic communications to LAs and industry to respond to a food crime threat.

SIRs: Strategic Intelligence Requirements: Identified gaps in our understanding about food crime control strategy priorities we are looking to better understand.

Measurement of science impact is a challenge across government but one which we need to address. We currently measure science outputs to ensure we actively communicate our research, operating in a manner that is open and transparent and these continue to increase year on year. We are currently developing metrics to measure how we deliver impact from our science, research and evidence programmes.
